

UNIVERSAL BULK MAIL SENDER

Windows Desktop Utility (Excel Integrated)

OUTLOOK DESKTOP

WEB / APP PASSWORD

CUSTOM SMTP

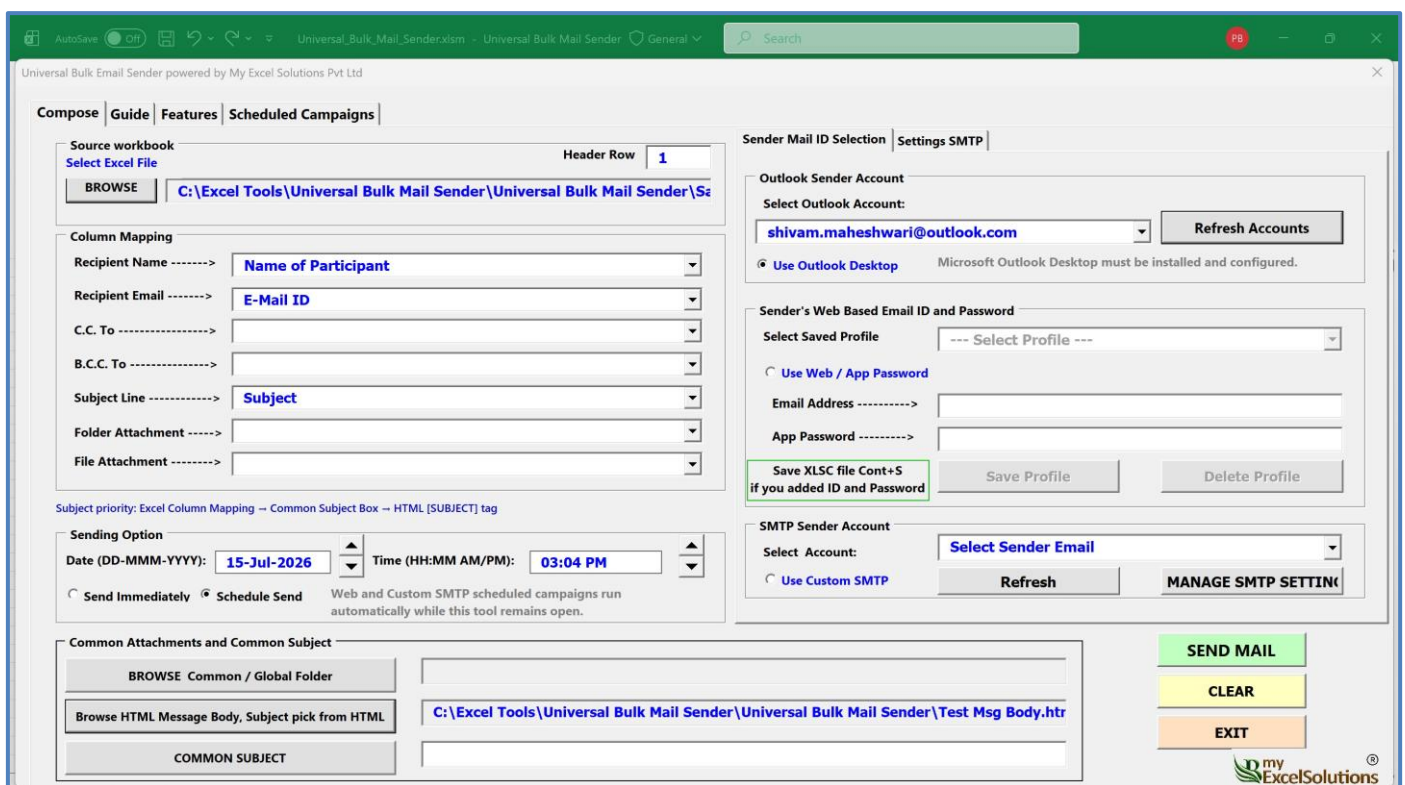

Turn any Excel recipient list into personalised, attachment-ready email campaigns from one secure desktop application. No fixed Excel template. No recurring cloud-platform subscription. No need to upload confidential client data to third-party marketing platforms.

Dynamic Excel Mapping

HTML Personalisation

Unique Attachments

Scheduled Campaigns

The screenshot shows the 'Compose' tab of the Universal Bulk Mail Sender application. The interface includes a top menu bar with 'Compose', 'Guide', 'Features', and 'Scheduled Campaigns'. Below this, there are several sections for configuring the email campaign:

- Source workbook:** A dropdown menu to select an Excel file, currently showing 'C:\Excel Tools\Universal Bulk Mail Sender\Universal Bulk Mail Sender\Se...'. A 'BROWSE' button is next to it.
- Header Row:** A dropdown menu set to '1'.
- Column Mapping:** A section with dropdown menus for mapping Excel columns to email fields:
 - Recipient Name: Name of Participant
 - Recipient Email: E-Mail ID
 - C.C. To: (empty)
 - B.C.C. To: (empty)
 - Subject Line: Subject
 - Folder Attachment: (empty)
 - File Attachment: (empty)
- Subject priority:** A text box containing 'Excel Column Mapping → Common Subject Box → HTML [SUBJECT] tag'.
- Sending Option:** A section with date and time pickers. The date is '15-Jul-2026' and the time is '03:04 PM'. There are radio buttons for 'Send Immediately' and 'Schedule Send'.
- Common Attachments and Common Subject:** A section with a 'BROWSE' button for common attachments and a text box for the common subject, currently showing 'C:\Excel Tools\Universal Bulk Mail Sender\Universal Bulk Mail Sender\Test Msg Body.htm'.
- Sender Mail ID Selection:** A section with two tabs: 'Sender Mail ID Selection' and 'Settings SMTP'.
 - Outlook Sender Account:** A dropdown menu for selecting an Outlook account, currently showing 'shivam.maheshwari@outlook.com'. A 'Refresh Accounts' button is next to it.
 - Use Outlook Desktop:** A checked radio button with a note: 'Microsoft Outlook Desktop must be installed and configured.'
 - Sender's Web Based Email ID and Password:** A section with a dropdown menu for selecting a saved profile, currently showing '--- Select Profile ---'. There are also fields for 'Email Address' and 'App Password', and buttons for 'Save Profile' and 'Delete Profile'.
 - SMTP Sender Account:** A section with a dropdown menu for selecting an SMTP account, currently showing 'Select Sender Email'. There are also buttons for 'Refresh' and 'MANAGE SMTP SETTING'.

At the bottom right, there are three buttons: 'SEND MAIL' (green), 'CLEAR' (yellow), and 'EXIT' (orange). The 'my Excel Solutions' logo is in the bottom right corner.

A single dashboard for source workbook selection, column mapping, sender setup, scheduling, HTML content and attachments.

THREE SENDING ENGINES. ONE UNIFIED WORKFLOW. Choose the method that fits each campaign.

Outlook Desktop For organisations already using Microsoft Outlook • Send through configured Outlook accounts. • No App Password or SMTP setup required. • Use Outlook deferred delivery for scheduled mail.	Web / App Password For compatible Gmail, Yahoo, Outlook/Live and Microsoft 365 accounts • Save, select and delete multiple sender profiles. • Automatic provider/server routing where supported. • Use provider-generated App Passwords instead of normal passwords.	Custom SMTP For corporate domains, trusted relays and specialised server settings • Built-in and user-defined SMTP configurations. • Reuse one server setting for multiple sender email IDs. • Test connection before saving each sender profile.
---	--	---

SMART AUTOMATION THAT WORKS WITH YOUR EXISTING EXCEL DATA

Dynamic Workbook Mapping Select any suitable Excel file, enter the header row and map the required columns from responsive dropdowns. No fixed template is required.	Smart Subject Priority The first available subject is used in this order: Excel Subject Column → Common Subject → HTML [SUBJECT] tag.
Personalised HTML Emails Use XNAME in a Word-generated filtered HTML file to insert each recipient name while preserving formatting, links and signatures.	Recipient-Specific Attachments Map a different file or folder path for every recipient—ideal for invoices, certificates, statements and confidential documents.
Common / Global Folder Select one folder and automatically attach all files inside it to every email in the campaign.	Multi-Account Profile Management Save and reuse multiple Web and Custom SMTP sender profiles, then switch accounts directly from the dashboard.

BUILT FOR REAL BUSINESS WORKFLOWS

Use it for payment reminders, invoices, certificates, statements, internal circulars, customer communication, training material, software updates and document distribution.

ADVANCED SMTP + SCHEDULED CAMPAIGN CONTROL Professional

features without a complex cloud platform.

Cancel Selected

Run Selected Now

Delete Selected

Scheduled Web and Custom SMTP campaigns are processed automatically only while this tool remains open. Keep the computer awake and connected to the internet.

Outlook scheduled delivery is controlled by Microsoft Outlook.

Interrupted jobs are not resent automatically. Review them before using Run Selected Now.

About

Universal Bulk Email Sender

A product of My Excel Solutions Private Limited

www.myexcelsolutions.com

EXIT

Scheduled queue with status, controls and processing messages

REUSABLE CUSTOM SMTP SETTINGS

Save the Server Once

- Create a named custom SMTP setting with server, port, security and authentication.
- Reuse the same setting for multiple sender email IDs.
- Keep sender username and password specific to each mailbox.

Save Each Sender Separately

- Test the SMTP connection before saving.
- Save, update or delete sender profiles from the interface.
- Existing sender profiles retain a snapshot of their server configuration.

SCHEDULED CAMPAIGN QUEUE

Live Status Tracking

View Pending, Running, Completed, Failed, Cancelled and Interrupted jobs.

Campaign Controls

Refresh, cancel, run a selected job now or delete an unwanted queue record.

Sender & Message Visibility

See the sender method, sender email, scheduled time and last processing message.

Immediate or Scheduled

Send now, use Outlook deferred delivery, or place Web/SMTP campaigns in the queue.

Safe Recovery

Interrupted jobs are not resent automatically, reducing duplicate-send risk.

Secure Retention

Use an XLSC secure save when Custom SMTP profiles or queued campaigns must persist after closing.

THE MARKET EDGE A practical desktop alternative for Excel-driven email campaigns.

Why settle for a tool that supports only one sender method, one attachment pattern or one fixed workflow?

Capability	Word Mail Merge	Cloud Email Platform	Typical Script / Plugin	Universal Bulk Mail Sender
Data handling	Local through Outlook	Contacts stored in cloud service	Varies by script/plugin	Excel-driven local desktop workflow
Sending methods	Outlook only	Platform accounts	Usually one configured route	Outlook + Web/App Password + Custom SMTP
Unique attachments	Not native	Often limited	Requires setup/coding	Different file and folder per recipient
Common files	Manual workaround	Campaign dependent	Custom logic	One Global Folder for every recipient
Subject control	Basic merge field	Platform dependent	Custom coding	Excel / Common Subject / HTML tag
Scheduling	Limited / Outlook based	Usually included	Depends on implementation	Built-in queue plus Outlook deferred delivery
Sender profiles	Outlook accounts only	Platform-managed	Manual configuration	Save and reuse multiple Web and SMTP senders
Custom SMTP reuse	No	Usually not user-controlled	Manual coding	Save one server setting for many sender IDs

IDEAL FOR

Finance & Accounts Invoices, statements, payment reminders and reconciliations.	HR & Administration Payslips, certificates, notices and employee communication.	Sales & Marketing Personalised offers, follow-ups, brochures and customer updates.
Training & Education Course material, certificates, schedules and participant communication.	Consultants & Professionals Client reports, compliance documents and engagement updates.	Internal IT & Operations Software updates, policies, circulars and document distribution.
